

SPD-500I Analytical Variable Wavelength UV Detector

SPD-500I | Detectors

Analytical variable wavelength UV detector for HPLC and routine chromatography detection.

Key Features

- Analytical UV detector for HPLC systems
- Variable wavelength detection for method development
- Compact module suitable for laboratory system integration
- English PDF brochure available for detector selection

Typical Applications

- Analytical HPLC detection
- QC laboratories
- Research chromatography
- Method development

Selection Reference

Detector Type	Analytical variable wavelength UV detector
Application	HPLC and laboratory chromatography
System Fit	Analytical liquid chromatography systems
Documentation	English PDF brochure available
Voltage	Confirm voltage and plug standard before quotation
Document Status	English PDF version for international product selection

Final configuration, accessories, voltage, plug standard, documentation scope, and delivery details should be confirmed before quotation.
