

SPD-500Q Preparative UV-Visible Detector

SPD-500Q | Detectors

UV-visible detector for small preparative chromatography systems and purification workflows.

Key Features

- Designed for preparative chromatography detection
- Supports UV-visible monitoring in purification workflows
- Product image set includes multiple angles and module details
- Can be matched with preparative LC and DAC column systems

Typical Applications

- Preparative LC detection
- Fraction collection monitoring
- Compound purification
- Pilot purification laboratories

Selection Reference

Detector Type	Preparative UV-visible detector
Use Mode	Small preparative chromatography
Integration	Preparative LC and collection systems
Documentation	English PDF brochure available
Voltage	Confirm voltage and plug standard before quotation
Document Status	English PDF version for international product selection

Final configuration, accessories, voltage, plug standard, documentation scope, and delivery details should be confirmed before quotation.
